

Hasan Badruk

Digital operations. Marketing. AI.

I have been programming since 2016. My work connects day-to-day business administration, marketing and software development: remote, with a defined scope and reviewable outputs.

PRACTICAL SUPPORT

Back office & customer communication

Quotes and invoices from approved instructions, email drafts, task lists, document preparation and CRM data maintenance.

Marketing & digital content

Landing pages, website content, newsletters, ad creatives and short videos, published through an agreed approval process.

Software & AI-assisted workflows

React, Next.js, TypeScript, web applications, internal tools and AI integrations. Daily use of ChatGPT and Codex with review of the outputs.

TWO EXAMPLES OF MY WORK

Zauntura

A business in my own investment portfolio: quote and invoice preparation, plus work on the website and online store.
<https://zauntura.de>

Growthaiq

My interactive inbox demo: organising enquiries, preparing a reply and showing approval. A simulation with sample data, not a client-result claim.
<https://growthaiq.com/en/inbox-demo>

INDEPENDENT PROVIDER - NOT AN EMPLOYMENT APPLICATION

I work from the UAE, in German and English. Contracting and invoicing through Codaiq LTD (UK), trading as Operell. Scope, working hours, fees and data access are agreed beforehand. A free introductory call and one small, agreed sample task are available.
